TVET Financing: Some key issues / proposals for the way forward

- General
 1. Country-specific context (Political dynamics/will, society) have to be taken into consideration for all efforts for sustainable TVET financing
 2. Continuous awareness raising / participative processes among all stakeholder is important
- Fund generation

State budget in many Asian countries is the main income sources
→ mostly, public funds are “not sufficient”
→ but effectiveness / efficiency of utilization is also important
Enterprises contribute little, need to be further motivated
- Administration / allocation of funds
 1. Allocation mechanisms generally need involvement of funding stakeholders
 2. TVET funds (example Malaysia): Independent institution and sound legal basis are crucial
